Skills

- **Programming Languages:** Java
- **Web Frameworks:** SpringBoot
- **Databases:** MySQL
- **APIs:** RESTful APIs
- **Web Development:** HTML, CSS, JavaScript
- **Developer Tools:** VS Code, Git, Github

Certifications

- **Web Developer** — Testing Shastra
- **Full Stack Java Developer** — Testing Shastra
- **Java Programming Fundamentals** — Infosys SpringBoard

Projects

Online Complaint Management System

- Developed a Java-based Online Complaint Management System to register, track, and resolve user complaints efficiently.
- Implemented the project using JSP and Servlets, with MySQL for backend data storage.
- Added form validation, status tracking, and error handling for robust complaint processing.

Library Management System

- Developed a Java-based Library Management System to streamline library operations such as book management, user registration, and book transactions.
- The system follows the MVC architecture using JSP and Servlets for the frontend and controller layers, and MySQL for backend data storage.
- Improved the efficiency of library tasks by digitizing manual processes, reducing paperwork, and allowing easy monitoring of transactions.

Achievements

- Completed multiple academic and personal projects on time with quality results.
- Learned new technologies like Java, Spring Boot, and MySQL independently.
- Maintained good academic performance while working on technical projects.

Languages Known

- English (Fluent)
- Hindi (Native/Bilingual)
- Marathi (Proficient)
